Интересности в Git

Reflog. Отмена операций.

\$ git checkout 1234568

\$ git reflog

1234571 HEAD@{0}: checkout: moving from one-branch to another-branch

1234570 HEAD@{1}: merge origin/feature-branch: Fast-forward

1234569 HEAD@{2}: commit: The commit message goes here.

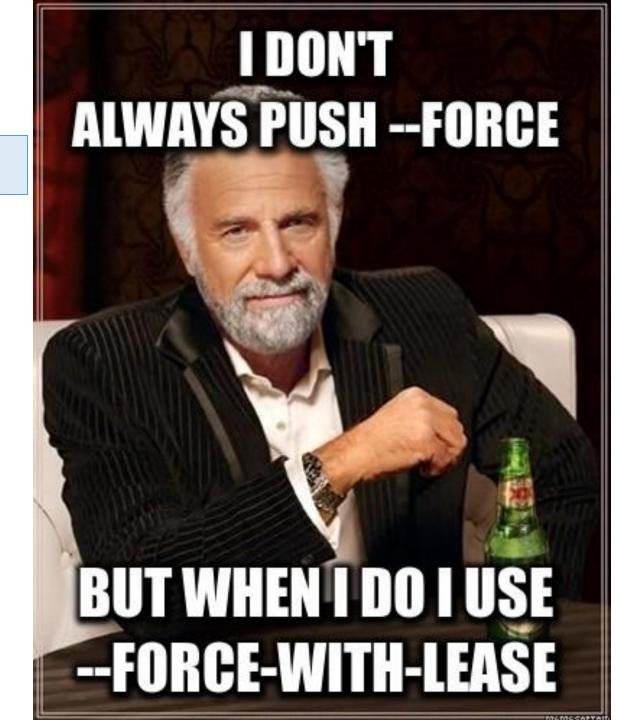

1234568 HEAD@{3}: reset: moving to 2234567

1234567 HEAD@{4}: rebase finished: returning to refs/heads/one-branch

\$ git checkout HEAD@{3}

Git please

\$ git config --global alias.please 'push --force-with-lease'

git commend

\$ git config --global alias.commend 'commit --amend --no-edit'

\$ git add Dockerfile \$ git commit -m 'Update Bitbucket pipeline with new Docker image' # (facepalm) \$ git add bitbucket-pipelines.yml \$ git commend

git it

\$ git config --global alias.it \
'!git init && git commit -m "root" --allow-empty'

\$ cd shiny-new-thing \$ git it Initialized empty Git repository in /shiny-new-thing/.git/ [master (root-commit) efc9119] root

Diff. Разница между коммитами.

\$ git diff < commit1>.. < commit2>

\$ git diff --cached

git staaash

```
$ git config --global alias.stsh 'stash --keep-index'
$ git config --global alias.staash 'stash --include-untracked' $ git config --global alias.staaash 'stash --all'
```

Удобные алиасы

```
git stsh # скрывает только непроиндексированные изменения в отслеживаемых файлах git stash # скрывает все изменения в отслеживаемых файлах git staash # скрывает неотслеживаемые и отслеживаемые файлы git staash # скрывает игнорируемые, неотслеживаемые и отслеживаемые файлы
```

git merc

\$ git config --global alias.merc 'merge --no-ff'

git shorty

\$ git config --global alias.shorty 'status --short --branch'

Log. Более приятное форматирование.

Алиасы

```
alias gl='git log --oneline --decorate'
alias gh='git log --color --pretty=format:"%C(yellow)%h%C(reset) %s%C(bold red)%d%C(reset)
%C(green)%ad%C(reset) %C(blue)[%an]%C(reset)" --relative-date --decorate'
```

```
085c69e - Thu, 22 Sep 2016 15:44:53 -0700 - Junio C Hamano (8 hours ago) (origin/pu)

commit 0952ca8a959ec3ecd8e929592249732e619416e3
Merge: ae1ae60 07e7dbf
Author: Junio C Hamano <gitster@pobox.com>
       Wed Sep 21 15:15:29 2016 -0700
   Merge branch 'jk/reduce-gc-aggressive-depth'
    "git gc --aggressive" used to limit the delta-chain length to 250,
    which is way too deep for gaining additional space savings and is
    detrimental for runtime performance. The limit has been reduced to
    50.
    * jk/reduce-gc-aggressive-depth:
      gc: default aggressive depth to 50
commit ae1ae600db5e159c4563ee080531b9500c26d635
